Contents

Related Titles vi

Preface vii

Chapter 1. **The Origins of the Cells of Vertebrate Retina**
J. STONE 1

Chapter 2. **Regulation of Rhythmic Photoreceptor Metabolism: A Role for Post-receptoral Neurons**
J. C. BESHARSE, P. M. IUVONE and M. E. PIERCE 21

Chapter 3. **The Primary Structure, Chemistry and Molecular Modelling of Rhodopsin**
J. B. C. FINDLAY, D. J. C. PAPPIN and E. E. ELIOPOULOS 63

Chapter 4. **The Molecular Genetics of Photoreceptor Cells**
J. D. FALK and M. L. APPLEBURY 89

Chapter 5. **Morphology and Distribution of Catecholamine-neurons in Mammalian Retina**
J. NGUYEN-LEGROS 113

Chapter 6. **Neuron Network in Catfish Retina: 1968–1987**
H. M. SAKAI and K.-I. NAKA 149

Chapter 7. **Astrocytes in Mammalian Retina**
J. SCHNITZER 209

Chapter 8. **Growth Control in the Retinal Microvascultature**
P. A. D'AMORE, A. ORLIDGE and I. M. HERMAN 233

Chapter 9. **Gliosis of the Mammalian Retina: Migration and Proliferation of Retinal Glia**
L. M. HJELMELAND and A. K. HARVEY 259
